

Natural gas is coming to **Listowel**

The natural gas network

Natural gas will soon be available to homes and businesses in Listowel Town, bringing all of the benefits of natural gas which over 680,000 domestic and commercial customers around the country currently enjoy. For central heating and cooking, natural gas provides a continuous, clean and controllable supply of instant energy, at a very competitive price.

Gas Networks Ireland delivers natural gas across 20 counties through the pipeline network and does this on behalf of all gas suppliers. We are also responsible for connecting all natural gas customers to the network.

The Gas to Listowel project was approved by the Commission for Regulation of Utilities (CRU) in February 2016. Following this, Gas Networks Ireland contracted Kerry Ingredients in Listowel as a large anchor load customer which enabled the project to proceed to design and construction. The construction of a local distribution gas network in Listowel Town will present homes and businesses in the town with the opportunity to connect to the natural gas network and avail of significant energy savings.

Construction works commenced on the Feeder Main route during Summer 2017, while works in Listowel Town will commence in early 2018.

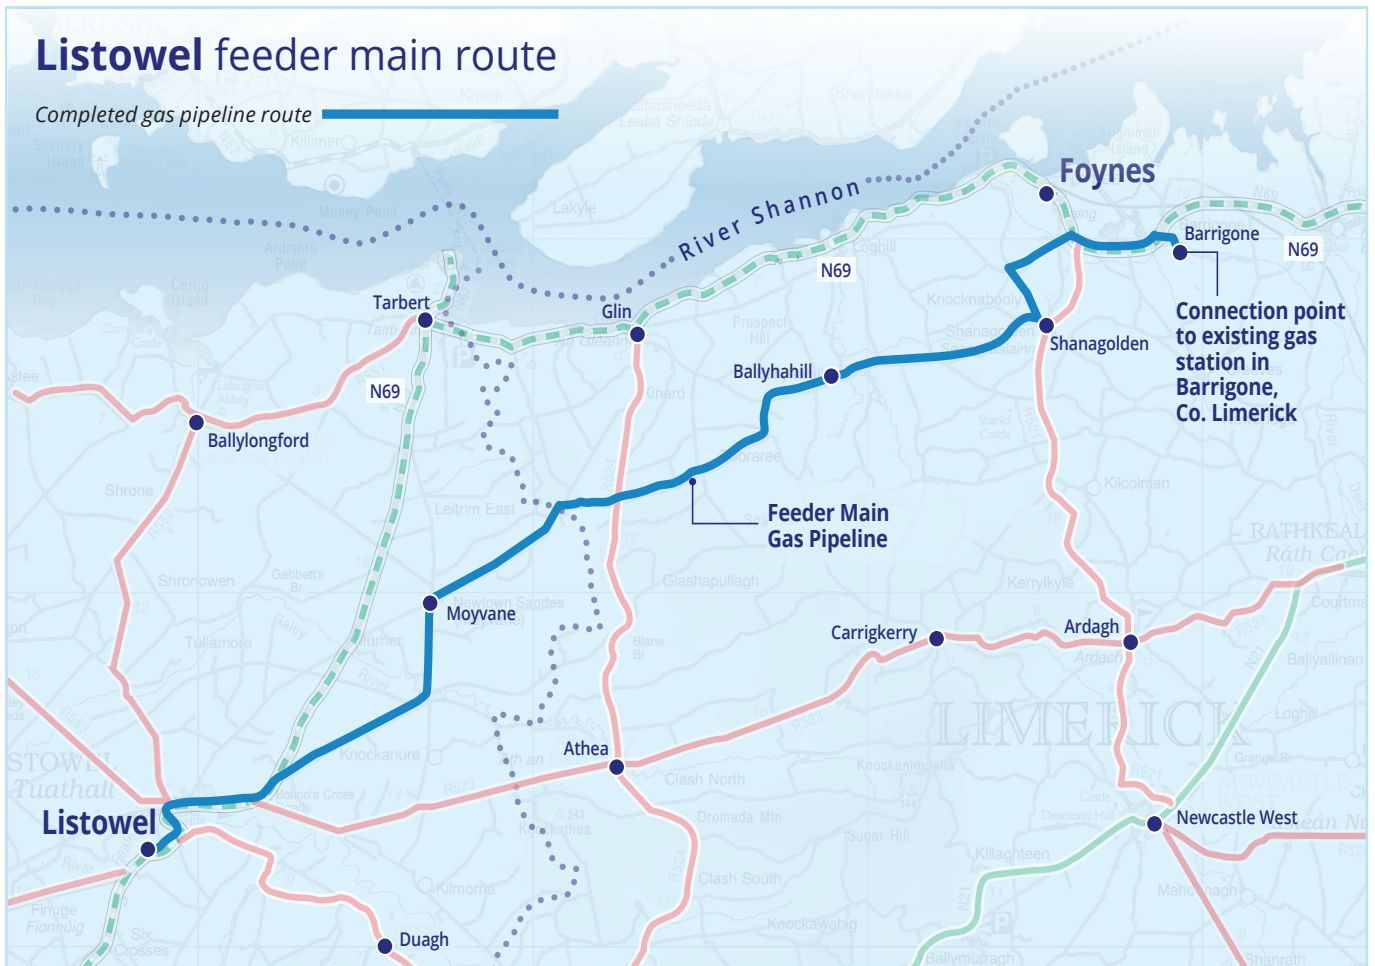

Natural gas pipeline map

Project overview – bringing natural gas to Listowel

The Gas to Listowel project involves the construction of a 41km Feeder Main natural gas pipeline from Barrigone, Co. Limerick, passing through Ballyhahill, Co. Limerick and Moyvane, Co. Kerry to Listowel Town. The route is shown on the map below.

The construction of the local gas distribution network in Listowel Town, comprising approximately 9kms of gas pipelines, will follow work on the Feeder Main and is scheduled to begin in early 2018. Delivered by our highly-experienced construction team, the Gas to Listowel project will facilitate both domestic and commercial connections to customers along the route and within Listowel Town. Local gas distribution networks will be constructed in Ballyhahill and Moyvane, and gas will be available to customers in these areas later in 2018.

Gas availability

The tables and map below show the preliminary streets in Listowel Town where natural gas may be made available. The streets listed are subject to change. The gas network will continue to expand over time to meet future business and domestic demand.

Streets where works are planned in 2018

| | | |
|------------------|------------------------|----------------------|
| Ballybunion Road | Convent Street | Market Street |
| Bridge Road | Courthouse Road | O'Connell's Avenue |
| Charles Street | Feale Drive | The Square |
| Church Street | John B Keane Road | Tea Lane |
| Cleveragh Road | Listowel Business Park | Upper Church Street |
| Colbert Street | Main Street | William Street Upper |

Natural gas will soon be available to homes and businesses in Listowel, bringing all of the benefits of natural gas that over 680,000 customers around the country currently enjoy.

For central heating and cooking, and for a continuous, clean and controllable supply of instant, environmentally friendly energy at a very competitive price – think natural gas.

Eight great reasons to **switch to natural gas**:

- **Cheaper:** costs 17% less than oil and 38% less than bulk LPG*.
- **Cleaner:** produces 24% less CO₂ than oil and 56% less than electricity.
- **Convenient:** piped directly with no need for storage tanks or fuel deliveries.
- **Compatible:** natural gas works with a wide range of modern appliances.
- **Efficient:** natural gas fuelled appliances are the most efficient on the market.
- **Faster:** instant heat and hot water.
- **Reliable:** always available, with no need to pre-order or pre-pay.
- **Versatile:** multipurpose fuel used for heating, cooling, hot water or cooking.

For business, a Combined Heat and Power (CHP) unit can be used to generate electricity on-site.

Phone or email Gas Networks Ireland to find out how easy it is to switch and enjoy the many benefits and savings of natural gas.
